

PROSPECTOR

Tap into your most valuable asset: YOUR CELL PHONE ADDRESS BOOK

Make Prospecting FUN!

"Gamify" your prospect sorting using the popular Tinder "swipe-to-sort" format. You have your prospect list on your phone, now you can use it AS your list! The App even prioritizes your list based upon the number of contact points you have. When a new Member enrolls – challenge him/her to swipe at least 40 people. COMING SOON: Different "hot buckets" for Product, Business and Local Prospects.

Make Feedback IMMEDIATE!

Send out a video link and the system alerts you when your prospect is watching it! No more guessing about marketing effectiveness. Improved response time means improved enrollment conversions.

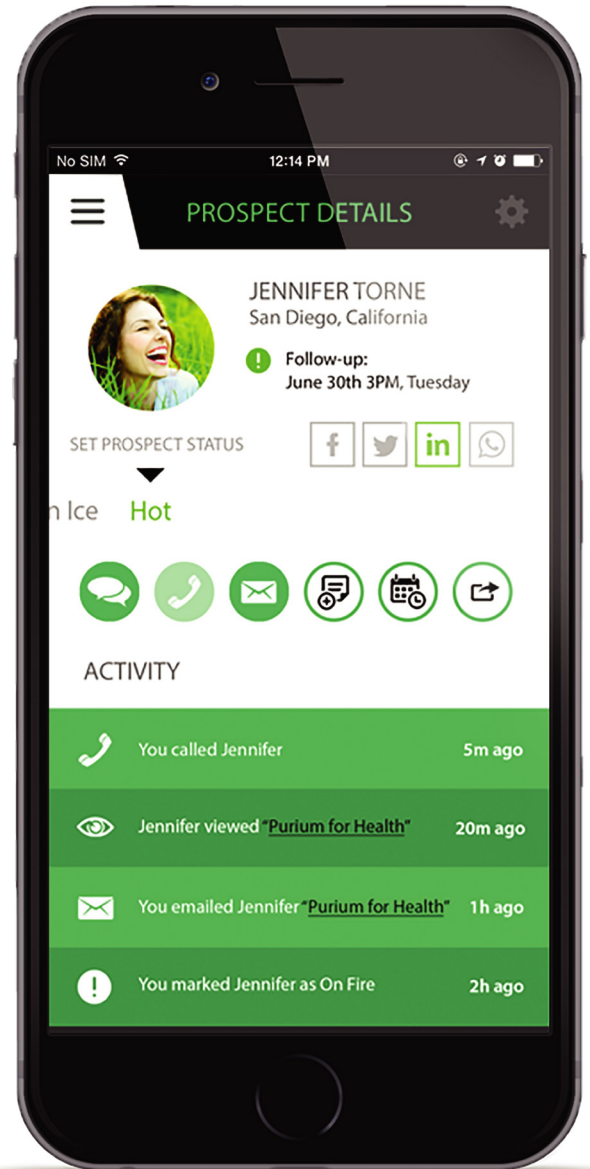

Make Follow-up SIMPLE!

All prospect communications (phone call, email and SMS texts) are tracked by the App. Eliminates time-consuming note-taking. See who is hot and who is not every time you open the App. Built-in follow-up reminders help you manage your time.

Make Activities VISIBLE!

The App dashboard shows you how many hot prospects your people have. Work with the workers. COMING SOON: Action Reports which show even more prospector information.

**Available for iPhone and Android
Launches late August 2015**

The End Result: Increased sales conversion.
